

TECh 8 Channel 3G/4G/LTE DVR

OVERVIEW

The new TECh 3G/4G/LTE Analogue High Definition (AHD) / High Definition (HD) series DVR allows you to view activity by our user friendly viewing system, so in the event of an incident, the footage from the vehicle can be accessed. Simply remove the solid state drive (SSD) and plug in with the download cable to view the footage via Datalive video playback.

Camera footage is automatically uploaded to the onboard solid state drive (SSD). Authorised operators can access up to 2 terabyte worth of data (SSD size dependant) and are able to access and download historical footage through an efficient 4G compressed data process.

Our 3G/4G/LTE DVR is flexible and can be configured as a stand alone solution or integrated into a multi feature telematics suitesuitable for all Commercial vehicles (HGVs & LCVs), gritters, sweepers, refuse vehicles, groundscare, cars, Fire Authority vehicles, welfare buses, yellow plant, and specialist vehicles.
